Summary

Junior Full Stack Web Developer with a strong foundation in coding and a passion for problem solving and exploring cutting-edge frameworks. Possessing a solid background in graphic / UX / UI design and business / startup development. Has delivered design solutions, improved web presence and increased sales. Has acquired skills in HTML, CSS, JavaScript, React, Node.js, Angular and brings a unique perspective to building user-centric, innovative and impactful products and services. Looking to join a forward-thinking company that impacts people's everyday lives and creates abundance.

Web Development Projects

NextChat - A React Native App - Oct 2024 - Course Project

<https://github.com/ibxibx/nextchat> <https://bit.ly/iannextchat>

Built a feature-rich mobile chat application from the ground up using React Native and Expo (for both Android and iOS) allowing users to easily communicate via text messages, images, and location sharing. Built and a user-friendly design interface with Gifted Chat, set up the Google Firebase/Firestore for anonymous authentication, message and media storage and integrated it into the app. Coded all the photo and location functions in the CustomActions component, offline and online data storage in the Chat component. Launched, tested and debugged the app with Android Studio to make sure all functions worked smoothly.

Berlin, Germany

MyMDB - My Movie Database (Server Side and Client Side) - Jun / Jul 2024 - Course Project

<https://github.com/ibxibx/mymdb> <https://mymdb-app.netlify.app/login>

Coded the complete server-side and client-side for a web application from scratch. Using the MERN Stack - created a RESTful API which interacts with a custom non-relational database (MongoDB), and tested API endpoints in Postman. Built the interface of a single-page responsive application; developed with React, resulting in a fully functional web-app allowing users to register and login, view their favourite movies and their details, and update their user profile and credentials. Used Bootstrap for styling and responsiveness. Launched and tested, debugged both the server and client side until flawless application performance was achieved.
